Dillon Roper

Seattle, WA | (253) 304-2201 | droper214@outlook.com | DillonRoper.github.io

Professional Summary

Computer Science and Philosophy double-degree student at the University of Washington seeking software engineering internship opportunities. Independently designs software across mobile app development, game engine architecture, and systems programming, with hands-on experience in Java, Python, C/C++, SQL, and Flutter/Dart.

Education

University of Washington Seattle, WA

Bachelor of Science, Computer Science. GPA: 3.60. June 2028 (expected)

University of Washington Seattle, WA

Bachelor of Arts, Philosophy. GPA: 3.60. June 2028 (expected)

Projects

Escapism August 2025 – Present

- Designed a procedurally generated RPG game engine with a heavily simulated AI character system, written in C++ using Godot.
- Architected a shared hash table of actions coordinating with per-character state structs stored in memory to enable scalable NPC behavior.
- Implemented per-character knowledge systems using copy-on-write principles to drive individual AI decision-making.
- Engineered the engine to support a world populated by thousands of unique NPCs belonging to a procedurally generated selection of deities, political systems, cultures, and species.

MyMusicTheory April 2026 – Present

- Developed a mobile application for music theory practice with a rapid-fire multiple choice question system, built entirely using the Flutter framework.
- Implemented bilingual support for English and Spanish and achieved full WCAG 2.2 AAA accessibility compliance.

Skills

Programming Languages: Python, Java, C/C++, SQL, Flutter/Dart

Technologies and Tools: Godot, Mobile App Development, Audio Processing, Accessibility (WCAG 2.2)
